

Lecture 4: The Entropy Methods

Tianpei Xie

Jan. 19th., 2023

Contents

1	Φ-Entropy and Logarithmic Sobolev Inequality	2
1.1	Tensorization Property of Φ -Entropy	2
1.2	Logarithmic Sobolev Inequality for Bernoulli Distributions	2
1.3	Logarithmic Sobolev Inequality for Gaussian Distributions	2
2	The Entropy Methods	2
2.1	Herbst's Argument	2
2.2	Bounded Difference Inequality	2
2.3	Modified Logarithmic Sobolev Inequalities	2
2.4	Concentration of Convex Lipschitz Functions	2
2.5	Exponential Tail Bounds for Self-Bounding Functions	2

- 1 Φ -Entropy and Logarithmic Sobolev Inequality
 - 1.1 Tensorization Property of Φ -Entropy
 - 1.2 Logarithmic Sobolev Inequality for Bernoulli Distributions
 - 1.3 Logarithmic Sobolev Inequality for Gaussian Distributions
- 2 The Entropy Methods
 - 2.1 Herbst's Argument
 - 2.2 Bounded Difference Inequality
 - 2.3 Modified Logarithmic Sobolev Inequalities
 - 2.4 Concentration of Convex Lipschitz Functions
 - 2.5 Exponential Tail Bounds for Self-Bounding Functions
